Fruit Ridge Notes - Tuesday - June 11 - 2019

...A Beautiful Sunny Day ...Low Winds Right Now - 10.30am

But Winds supposed to get to 10 mph later this Afternoon.
WunderGround says more Showers Tomorrow Night and Thursday AM....

**** **Guys are Spotting some Secondary Scab....** You really need to look really hard.... Important to get Going on it ASAP to keep Scab off the Fruit ...

And about the best Strategy for Squelching Secondary....??? Full Rate [5 Lbs] Captan 80WDG -- a Full-Cover [or 2-Alt-Centers] every Week. Don't let up.

And if you get some Warm/Hot-Dry Weather...??? That will help you a lot ... Seriously A LotMore than you might think. It could mean the difference between 3 or 4 Apps.... and 6 Apps.

0 - Zero [-0-]Days-P.H.I..... 40 Lbs-Ac-Seasonal-Limit

**** Quite a lot of Rag Tag Bloom left around the

Hood.... Especially on some Beautiful-Young-Major-Investment-Systems....

But...Remember...

Lots of Folks have seen where they have for really sure absolutely "Sprayed-On" their own F.Blight-Infection with the Wind and Water from their own Sprayer-Machine with their Thinning Efforts or other Applns like maybe Kudos.... or Calcium Nutrition ...

Does Strep still work for You...??? Excellent ...1 - 1.5 Lb= \$13-\$19 Or Better-Still-- "**005**" = 1 Pint = \$7.95

******Friends in WA & PA....** Have pushed out quite a few Blocks of Honeys.... mostly where they had really fierce F.Blight.

You know what.... ???? Listening to a bunch of Associates from N.Y....PA.... Wherever they had a serious CS2**005** Program in place...???They still have serious production Honey Crisp Blocks. Seriously.

Wayne County N.Y. is still the largest Apple Producing County in the U.S..... and Interestingly Enuf.... Those are Alicandro Disciples.... And they All use the CS2**005**.... and Wayne County had little to none FireBlight catastrophes in the last 2 years. 🙌👍😊

.....Areas where they still do the old
BluePaintSludgeCoppers...??? Not Pretty... Up-in-Smoke...

There is a significant Group of You that do Bizz with,
and/or have acquaintances in these other Geographics, that tell me
you are all hearing the same thing..... Quite devastating for those
Folks.

****** I just Heard more "Reinforcement"**About "Saving
Winter Injury Trees" ...by Using the "RootRx" ...from Redox. Use I
gal-per-Treated-Acre---applied into the Weed-Control-Strip and
also can be applied thru Fertigation.

****** Several Institutions of Higher Learning in the U.K.
Collaborated** and did some extensive Research with some Folks
eating 1 cup of **Blueberries** a Day Had pretty amazing results
in reducing Risk of Heart & Stroke Issues. Its in your June--Fruit
Growers News..... Good stuff.

****** I Really Looked Hard Looked a long Time....** in the
Protocol 10-Ac-Apple-Trial-Block by my House this morning
I cannot find any Diseases of any kindas I seriously looked for
Scab Symptoms.... None.... Nodda Nuthin.
I am gonna get somebody with a younger Body to Look for me
also.... None of those Trees are huge by any means but I want
someone to climb to the tops. If my FatAss climbs to the top I'll
likely smash the Tree.

These Trials have had only "**005**" for Scab Control ... We have
added Tebuconazole for Mildew 3 Times.... But we all know that
wont seriously help with Scab.... Way back 25-30 Years when we
called it "Elite" it only effectively 'helped' against Scab for 2 - 3
Years...??? We like Teb for it's Cheap-Co\$t against mildew.

Altho there is a bunch of our Growers that claim "**005**" will
take care of Powdery Mildew as well.....and also Downy in Grapes...

****** At 3.30 pm** now... Breezy.... 7 - 8 - 9 mph ?????

... Sorry for Delay ...Had a Lunch Meeting 12 Guys together
...Discussing Bitter Pit in Honeys Among other Issues.

Praying Gods Blessings on Your Tuesday PMr
