Fruit Ridge Notes - Wednesday - August 14th - 2019

Hello Friends

Noticed on the "10-Day" No Rain "Chances" exceeding 48%.... I see a 30% tomorrow....a 48% Chance early Sunday ... a 34% early Monday ... and Several 25% Chances...
3 Days with plenty of Cloud Cover ...7 Days with plenty of Sun. No Winds predicted over 10 mph except Sunday.

****** Our Fave Cherry Guys Up North ...** that also Grow apples....tell me they are finishing up Tarts-Harvest

...Now Gearing up for serious "Post-Harvest-Cherry-Leaf-Spot" Control-Applns....and the Spider Mites ...

Their MSU-Extn.Folks there are warning them to get Applns made on Apples for A.Maggot and C.Moth. Lots of S.J.Scale Trap-Warnings as well...

RealDealNuisance Turkeys are already damaging some Honeys on LowLimbs.... Some of You Guys have proven that the "**AvianControl**" product works well on Turkeys. It treats them like Tear-Gas treats us... 😊🙄

******SWDs are all Over the Place....** Huge Numbers. Its cheap to Kill'em. Just Kill'em.

******Lookn at some Beautiful Gala Crops** Yesterday.... Perfect Thinning Job... They Thinned *Early and *Aggressively Using ExilisPlus & Carbaryl.... Simply perfect. Some Blocks they hit Twice And they have a 1st-Class-Irrigation System.

****** The Most Popular "'Brown-Rot-I-Cides'"**goin out the door for **Peaches** Indar ...Captan ... and Merivon & LunaSensation & FlintExtra all work well & recommended by MSU.

We always keep Captan in the Tank...helping to prevent Resistance. By itself Captan is pretty darn OK for BrownRot... OK...

****** Klickitat County Washington...** Named after the Klickitat Tribe of the 'Yakima Native Americans' Home of "**A&O AgResearch**"where they did extensive work with getting good Red Color on **Fuji** Showed that the Redox DiKaP Nutritional that so many of you Guys have been telling me works so good for coloring...

Did the JobBetter than anything. I'm gonna send you that Trial Data on a separate EMail...

******Remember ...**What Alicandro says about 'Summer-Pruning-Honeys'...?? "*Keep the Pruning Crew on DeCaf*"

**** **FertigationPretty wonderful....** One Fave that does a Superb job tells me he also makes at least 2 Nutritional-Trips with his Weed-Sprayer...in the Herbicide-Tank-Mix. He does not like to put a really high %%% of his Nutrients on thru the Drip...as it is dripping in that same spot all the time...??

Kinda reminds me of another Fave that last Season did several Trips with his Weed-Sprayer.... He really really loves his Weed-Sprayer.... It does a perfectly splendid job.... But he put several ...like 5 or 6 apps of Calcium on the Soil ...the Good Stuff ...on his Honeys....Redox Calciums And only did 3?? maybe 4 Foliar Apps Calcium.... and No Bitter Pit ...Zero -- None.

Love Love Love ItWhen a Plan Comes Together

**** **OxiDate 2.0...Mentioned Yesterday in Blues.... Yes ...**That 2.5 Pint Rate is into a 35 - 45 GWA-ApplnIf you're using 75-80 GWA, go to 2 Qts... Good Question...

Take Care
